1986 EARLY CAREER SATISFACTION SURVEY: TECHNICAL MANUAL

INTRODUCTION

This manual provides technical information about data collected and prepared for analysis in the 1986 Early Career Satisfaction Survey (ECSS) (Lockhart, Wagner and Cheng, 1987). It is intended as an audit trail for future users of the data. Appendixes are provided to facilitate the use of a data tape that accompanies this report. A companion document, the "1986 Early Career Satisfaction Survey: Analytic Report" provides analyses of some of the data reported in this manual. The ECSS is the latest survey in ARI's Enlistment Decision Survey (EDS) project.

This contract is part of an overall effort to develop an information base on the enlistment and reenlistment decisions of U.S. Army service members. The primary goal of these reports is to document the effects of an Army Realistic Job Preview (RJP) called the Joint Optical Information Network (JOIN).

Past research has indicated that RJP's reduce turnover and increase job satisfaction, performance, and organizational commitment of new employees (McEvoy & Cascio, 1985; Reilley, Tenopir, & Sperling, 1979; Premack, & Wanous, 1985). The Army and Navy developed JOIN to provide an RJP for new recruits.

JOIN

JOIN is a microcomputer-based system that Army recruiters and guidance counselors use to provide applicants for Army enlistment with RJP's. Figure 1 displays the steps taken during the recruiting process. JOIN is generally used prior to signing a contract.

Sands, Gade, and Bryan (1983) report that JOIN combines state-of-the-art technology from several fields into a unique, powerful, computer-based, audiovisual, communications, and data management system. The system's two primary objectives were originally (1) to increase awareness of military career options and (2) to promote person-job matches that optimize job satisfaction and productivity while decreasing attrition and personnel turbulence (Pass, 1985). From these beginnings, JOIN has evolved into the current system with additional goals and objectives.

One use of JOIN is to enhance the sales presentation component of the recruiting process by helping applicants develop

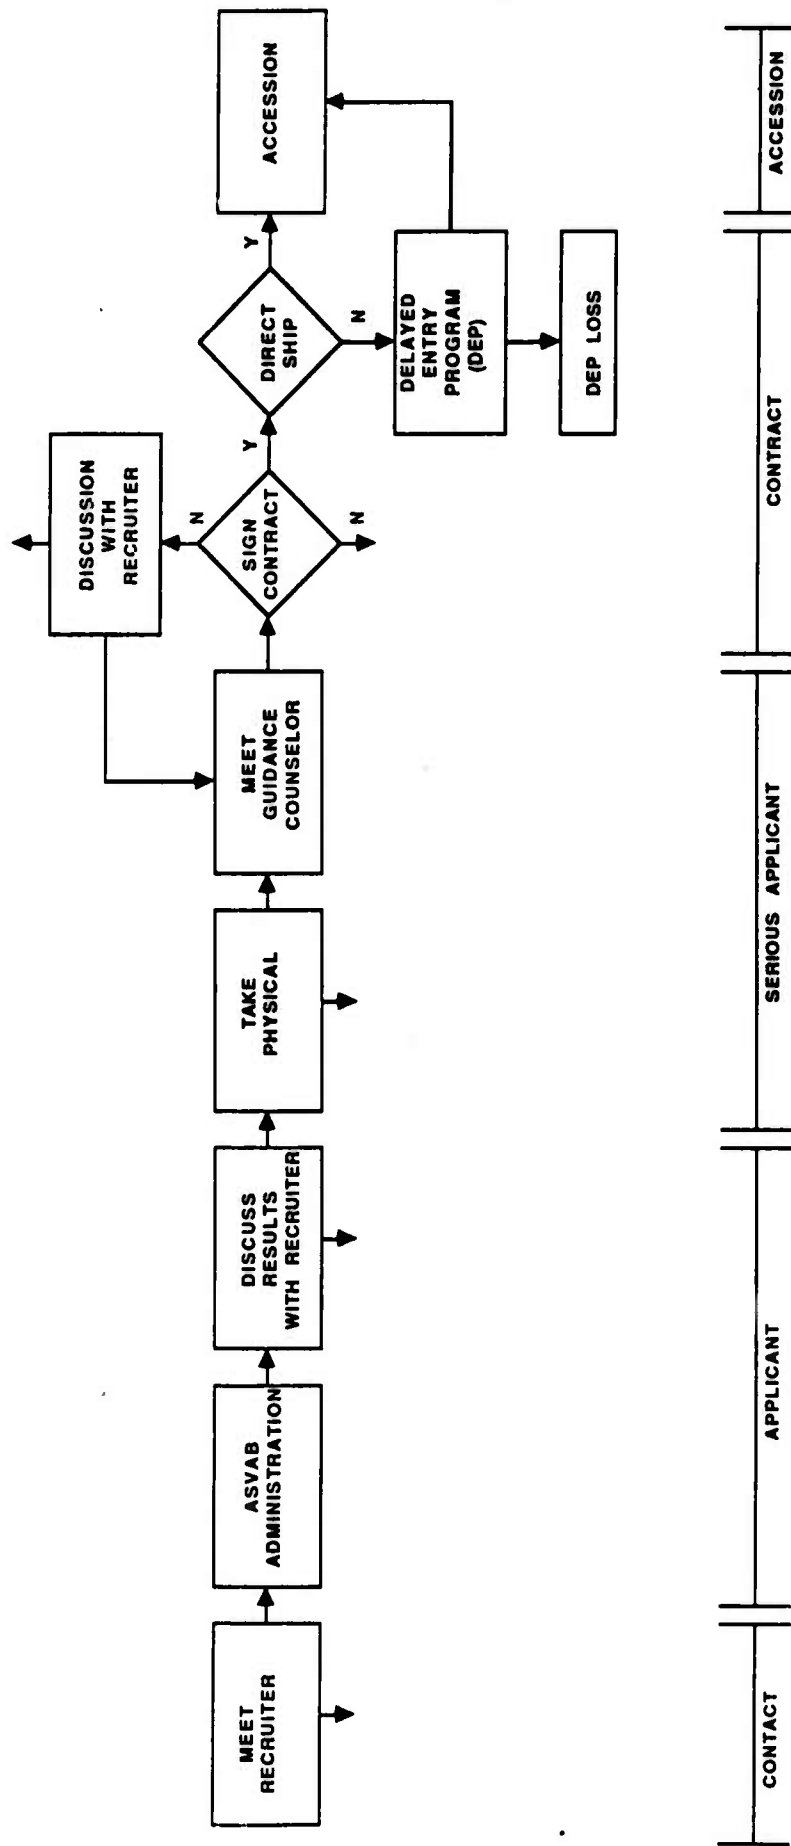

Figure 1. U.S. Army Enlistment Process

more realistic expectations about the Army. It is believed that more accurate expectations result in recruits who are better prepared for life as a soldier. This better preparation should:

- 1) reduce the incidence of malpractice charges and the attendant costs
- 2) reduce premature attrition
- 3) improve the person-job match

ECSS and EDS Projects

The purpose of the Early Career Satisfaction Survey (ECSS) was to resurvey first-term enlistees two years after an initial survey. This resurvey sought to identify changes in these enlistees' attitudes about the Army, their careers, and their future goals. Some of these enlistees had been exposed to JOIN, while others had not been exposed to JOIN. This resurvey sought to determine the effect of JOIN on those enlistees who were exposed to it.

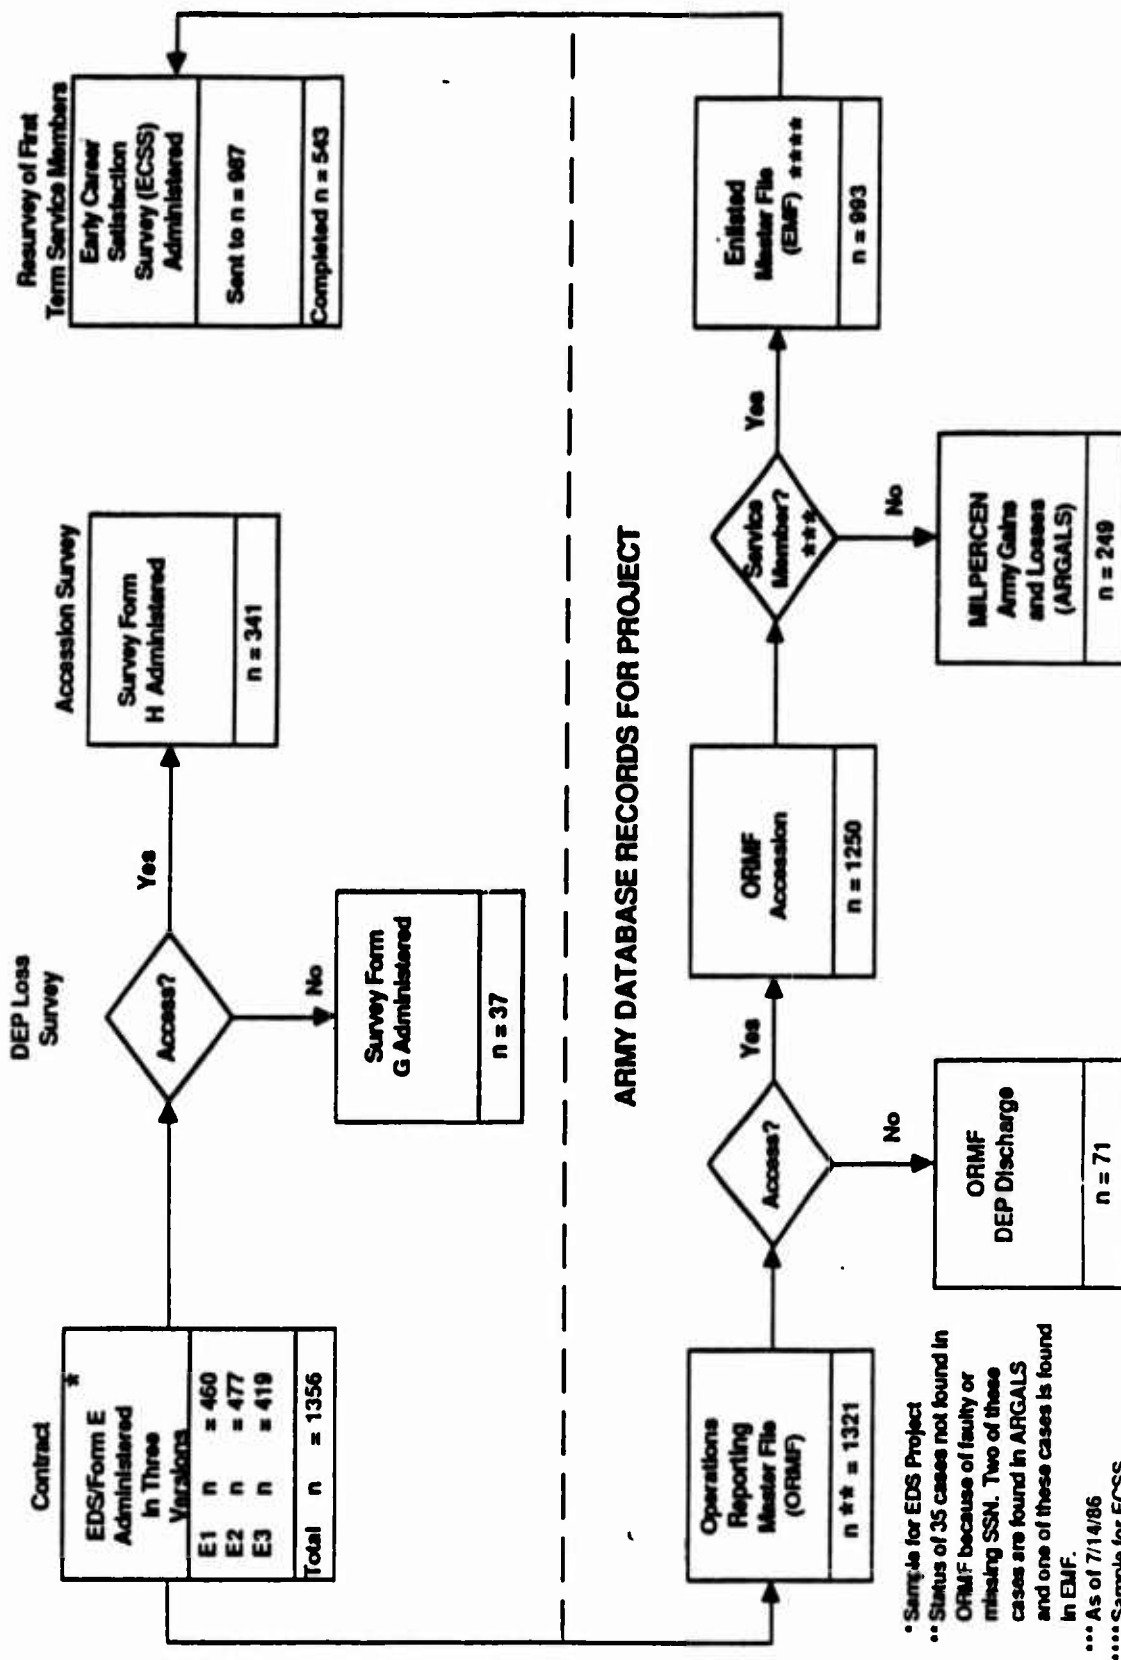

The 1984/1985 ARI Enlistment Decision Survey sample consisted of 1,356 enlistees that (see Figure 2) ARI had surveyed at the MEPS in September 1984 (Survey Form E). This initial survey was completed after the enlistees contracted for the Active Army. The survey contained questions on 1) expectations about the Army, 2) expected satisfaction with the training MOS, 3) satisfaction with the job information provided by the guidance counselor, 4) satisfaction with the information provided by the recruiter, 5) self-reports of exposure to JOIN, and 6) importance of guarantees of training in a particular MOS.

These questions were also included on a second form (Form H) of the survey. Form H was administered to a sample of 341 recruits when they accessed.

ARI administered a third form of the survey (Form G) to a sample of 37 subjects who failed to enlist per their Delayed Entry Program (DEP) agreement. The ECSS is a resurvey of the soldiers who completed the initial survey (i.e., Form E) and were still in the Active Army files as of 16 July 1986. See Figure 2 for a diagram of these surveys and the other data compiled in this project.

Respondents who completed survey Form E when they contracted are not part of the ECSS sample if: a) they dropped out of DEP before accession (n = 71); b) they attrited from the Army after accession (n = 249); or c) they were not found in the EMF for

other reasons such as missing SSN (n = 43). Data on Form E respondents who signed contracts but who attrited from the DEP before accession into the Army are available from the U.S. Army recruiting command's Operations Reporting Master File (ORMF). Information on soldiers who entered the Army but attrited early in their career is available from the Military Personnel Center (MILPERCEN) Army gains and losses (ARGALS) file (249 subjects).

Additional information about the ECSS subjects is available from the Personnel Information Systems Command (PERSINSCOM) Enlisted Master File (EMF).

The ECSS was mailed to 987 soldiers who completed Form E two years earlier and who were in the EMF on 16 July 1986. Note that an additional six subjects were in the EMF but did not have addresses and were not sent a questionnaire.

ECSS SURVEY DEVELOPMENT

One of the goals behind the development of the ECSS was to collect information about the accuracy of information provided to soldiers during the recruiting process. ARI believed that this was an appropriate time to ask most of these soldiers these types of questions for the following reasons:

- 1) Since these soldiers had enlisted within the last two years, they should still remember the enlistment process.
- 2) Most of these soldiers should still be in the Army.
- 3) Since most of these soldiers should have completed training, they will have some experience with life in their permanent duty station.

Another goal of the ECSS development effort was to assess the effects of using JOIN during the recruiting process. This assessment includes statistical tests of the relationship between receiving JOIN and several components of satisfaction.

Appendix A contains a copy of the questionnaire, and Appendix B contains copies of the letters sent to these soldiers.

New Questions on the ECSS

The ECSS is divided into four major sections: 1) Career Choice Information, 2) Career Factors, 3) Career Perceptions, and 4) Career Background. The Career Choice Information section contains only new items. The Career Factors section contains only items that are from previous ARI surveys. The Career Perceptions and Career Background sections contain both items from other sources and new items.

There are 13 items in the Career Choice Information section. The first 10 items ask the soldiers to reflect on the first time they met their recruiter and consider the decisions they made when they chose an Army MOS. The purpose of these items is to collect data about how applicants perceive the recruitment process. Item 11 asks the soldiers about the Army guidance counselors at the MEPS. The final two items ask the soldiers what they would probably be doing if they were not in the Army. All of these are new items.

All of the items in the Career Factors and Career Perceptions sections come from other sources. In the Career Background section, questions 104 through 112 were designed specifically for this survey to determine the effects of primary, secondary, and duty MOSSs on job satisfaction. Questions 113, 117, and 118 are new items designed for the ECSS.

Previous ARI Questionnaires

Several items were taken from the 1985 Army Experience Survey (AES) (Westat Inc., 1986). Questions 93 through 103 on the ECSS were originally separate components of Question 18 on the AES. Questions 115 and 116 on the ECSS were Questions 26 and 27 on the AES. Two items on the ECSS came from Form E. Questions 114 and 116 on the ECSS were questions 64 and 134, respectively, on Form E.

Standard Job Satisfaction Measures

The ECSS's Career Perception section contains two scales originally developed by Hackman and Oldham (1975). The first scale (Items 74 through 78) measures general job satisfaction. The second scale (Items 79 through 92) measures five specific satisfactions: pay, job security, social, supervisory, and growth. These scales are well researched, and published data regarding the mean and standard deviation of several different samples are available.

Horizontal Bonding Measures

The Career Background section includes six items (Items 119 through 124) that measure horizontal bonding. Horizontal bonding is the integration among buddies and immediate team members. Data collected by both Marshall (1978) and Henderson (1985) have indicated that there is a strong relationship between horizontal bonding and combat effectiveness. Items 119 through 124 in this survey are horizontal bonding items taken from work Guy Siebold has been conducting at ARI. Conversations with Dr. Siebold indicate that these items (with the exception of item 123) have a high degree of intercorrelation. A recent report by Lockhart (1987) reviews recent research efforts investigating horizontal bonding.

DATA COLLECTION METHODOLOGY

Table 1 provides a schedule of the mailings. In order to maximize the return rate of the ECSS the following procedures were carried out.

- 1) prenotices were sent informing the soldiers of the upcoming arrival of the survey
- 2) self-addressed, stamped return envelopes were included with the questionnaire
- 3) a reminder was sent one week after the questionnaire was mailed
- 4) a second questionnaire was sent three weeks after the first questionnaire to the individuals who had not yet responded
- 5) letters signed by the Director of Military Personnel Management were enclosed with each mailing
- 6) a toll-free telephone number was provided that soldiers could call to ask any questions
- 7) the survey questions were designed to be easy to respond to
- 8) a patriotic and attractive cover was designed

Mailing	Date
Prenotice	13 August 1986
Questionnaire	20 August 1986
Reminder	27 August 1986
Second questionnaire	17 September 1986

Subjects

The subjects were 987 of the 1,356 soldiers who had completed survey Form E after enlisting at the MEPS in September 1984 and had mailing addresses in the Enlisted Master File (EMF) on 16 July 1986. Of the mailings sent to potential subjects, 73 were returned with incorrect addresses. Usable surveys include all (i.e., 543) those completed and returned prior to 6 November 1986. No surveys were returned with a substantial amount of unusable data.

Materials

The materials used in this study include mailed questionnaires, letters, and envelopes. A copy of the questionnaire used in this study is included in Appendix A. A copy of each letter used in this study is included in Appendix B. The questionnaires were mailed in 11 1/2 x 14 1/2 franked white envelopes. The return envelope provided for the questionnaire was a 10 x 13 preaddressed, prefranked white envelope. The prenotice, reminder, and thank you letters were mailed in 4 1/8 x 9 1/2 franked commercial envelopes.

Data Verification Procedures

When a completed questionnaire was returned, DRC sent a thank you letter to the participating soldier and put the questionnaire into a queue for entry into a data file. After the data from the questionnaire were entered into the data file, the questionnaire was put into a second queue to be entered into a second data file. Thus all the data were input to two separate data files. These files were compared after the 6 November 1986 cutoff date. In all cases where there was a difference, DRC checked the original questionnaire to determine the true response. The true response was then entered into a third, corrected data set, and the two original files were put on tape for storage. All of the analyses conducted were based on this corrected data set.

DATA COLLECTION RESULTS

Response Rates

The response rate for the questionnaire was 55% of the total sample and 59% of the sample with accurate addresses. Table 2 provides statistics relevant to the overall return rate.

Table 2

Statistics Relevant to Overall Return Rate

Event	Number	Percent
ECSS sample	987	100%
Inaccurate address in ECSS file	73	7.4%
Received but did not complete ECSS	366	37.1%
Completed ECSS prior to cutoff for entry (percent of total)	543	55%
Completed ECSS prior to cutoff for entry (percent of correct addresses)	543	59.4%
Completed ECSS but returned after the cutoff for entry	5	.5%

Data Quality

Item nonresponse was very rare in this questionnaire. See individual items in the codebook to determine if any individuals did not answer the question. In a few cases, individual responses were difficult to determine (e.g., circles that enclosed two responses or ten-point scales the subjects created, etc.). In these cases, a best guess was made as to the intended response. For example, one soldier added an eight, nine, and ten to a seven-point scale and then circled the ten. For this subject, we assumed a seven on the seven-point scale was the intended response. If no guess seemed to reflect the subject's intended answer accurately, then a nonresponse was assigned to the item.

Organization of Files on Tape

The data tape contains six files. Table 3 illustrates the formats of the files.

File Description

The files listed in Table 4 are described below.

ECSS. The ECSS is data from the Early Career Satisfaction Survey in flat file format.

SLB. The SLB file stores the SAS transport library. The SLB contains the SAS data set ESCC.

JOIN. The JOIN data file contains all of the information described in this report, including records of the original 1,356 individuals who responded to Form E. Figure 3 presents all the information necessary to understand the record layout.

Appendix C contains all the layouts for the source files compiled. It should be noted that Forms E1, E2, and E3 include responses to specific items in slightly different locations. For this reason, care should be taken when extracting Form E data. Care should be taken when extracting Form G and H data for the same reason. Figure 3 shows the column positions that indicated the type of form a record contains. For example, column 22-23 indicates form E type.

- * COLUMNS 22-23 INDICATES TYPE OF FORM E
- ** COLUMNS 550-551 INDICATES TYPE OF FORM G
- *** COLUMNS 1078-1079 INDICATES TYPE OF FORM H

It should also be noted that the layouts of Forms E, G, and H on the JOIN data file are slightly different from the original layouts included in Appendix C. Instead of having more than one line of data for each record, the second and subsequent lines are appended to the first line to form a single line of data. For example, instead of Form E data having four lines of length 132, these data are on one line of length 528.

Form G. File G contains 388 records that are in the DEP loss (Form G) file, but are not in the JOIN (Form E) file. Six of these 388 subjects also have information available from Form H. The layout of records on this file is the same as the original Form H layout in Appendix C.

Form H. File H contains 492 records that are from data collected in Form H, but are not in the Form E (JOIN) file. Six of these 492 subjects also have information available from Form G. The layout of records on this file is the same as the original Form G layout in Appendix C.

ORMF. File 0 contains 832 records that are from ORMF data collected but are not in the Form E (JOIN) file. The layout of records in this file is the same as the original ORMF layout in Appendix C.

Use of the Data Base Preparation Codebook

Appendix D contains the Data Base Preparation Codebook. The first few pages of the codebook include the layout for ECSS data. The following pages include information for each item in the ECSS. See Figure 3 for the location and description of various types of information.

RECOMMENDATIONS

DRC recommends that further analysis be conducted of this data set. Many questions can be examined using data collected in this study. Some of the questions include:

- 1) Are individuals who were highly satisfied with their recruiters likely to reenlist?
- 2) Do individuals who are satisfied with their recruiters also communicate a positive impression of the Army experience?
- 3) Do individuals who started thinking about enlisting in the Army at younger ages have greater satisfaction with the Army?
- 4) Do individuals who aspire to higher academic degrees intend to reenlist?
- 5) Do individuals who enlist because they are unemployed have intentions not to reenlist after having been in the Army?
- 6) Do recruits who are satisfied with their recruiters also have high job satisfaction and horizontal bonding?

In addition to the kinds of analysis suggested above, an analysis of written comments provided by the respondents could be conducted. These data could provide a rich source of information on the attitudes of first-term enlistees. Much can be learned about the effects of the recruitment process on soldiers' subsequent adjustment to Army life and their satisfaction with their jobs.

1986 EARLY CAREER SATISFACTION SURVEY

U.S. Army Research Institute
c/o Dynamics Research Corporation
60 Frontage Road
Andover, Massachusetts 01810

This questionnaire is numbered to maintain confidentiality of your responses. Please read carefully and complete all questions on this survey in the way that best reflects your feelings. Return this questionnaire as soon as possible in the postage-paid envelope provided. Thank you.

1986 Early Career Satisfaction Survey

The Army Research Institute (ARI) is conducting a survey of people who have entered the ARMY. You have been selected to participate in this important survey. Your answers will be seen by researchers only and will have no effect on you as an individual. Please read and follow all directions carefully.

NOTE

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and use to be made of the information that is collected.

The Department of the Army may collect the information requested in the Army Career Satisfaction Survey under the authority of 10 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. This information will be used for research and analysis purposes only.

HOW TO FILL OUT THIS SURVEY

- Read the directions twice before you begin.
- Read each question twice carefully.
- Mark your answers directly on this form.
- WHEN YOU FINISH THE SURVEY: Seal this survey in the envelope provided. Mail it to us — no postage stamp needed.

HOW TO ANSWER THE QUESTIONS

There are several types of questions that will be asked in the questionnaire. For most questions, several choices will be provided and you will indicate which is the best answer or answers for you.

Read each question carefully. Circle your answer with a clear, heavy mark.

EXAMPLE:

Are you male or female?

Male ①
Female 2

What is your MOS? 7 1 L

Do not skip an item. If you are unsure, choose the response which comes closest to how you feel.

When you have completed the survey and checked to make sure that you have answered all the questions, please follow the directions for returning it by mail.

Take your time on each question and select the one answer that best fits you. Please start now with Part I, Career Choice Information.

I. CAREER CHOICE INFORMATION

As you begin this survey, take a moment to reflect back through the months . . . to the first time you met your Army Recruiter.

This contact may have been by phone or in person. Now recall the conversations, the materials you were shown and your reactions to them.

Beginning with your initial contact with the Army Recruiter move forward in time . . . recalling each contact with him or her . . . and the information the Recruiter provided you.

Remember how the information was presented to you . . . such as by direct conversation with the Recruiter . . . by your reading of brochures . . . by your watching TV/Films . . . by your watching JOIN (a computer used for interviewing, testing, and displaying Army options) . . . or by some other method or presentation . . . and keep this in mind as you answer.

Now consider the decisions you have made concerning your choice of Army MOS and career field specialty.

1. Was the information regarding MOS provided to you by the Army Recruiter, complete enough to make a choice about enlisting in the Army?
(Circle ONE number)

Yes, information was complete enough 1
No, information was not complete enough 2

2. Was the information regarding Army life in general, provided to you by the Army Recruiter, complete enough to make a choice about enlisting in the Army?
(Circle ONE number)

Yes, information was complete enough 1
No, information was not complete enough 2

For a moment, place yourself in the shoes of your Army Recruiter. Remember that the Recruiter only knew what you wanted if you told him (her). Consider the information that the Recruiter knew about you based on your application/file and the kinds of questions you asked.

Consider the amount of information your Army Recruiter gave you and answer the following questions.

3. Given the Recruiter's understanding of your wants, how adequate was information provided on the MOS?
(Circle ONE number)

More than adequate 1
Adequate 2
Less than adequate 3

4. Given the Recruiter's understanding of your wants, how adequate was the information provided on Army Life in general?
(Circle ONE number)

More than adequate 1
Adequate 2
Less than adequate 3

5. At the time you enlisted, what kinds of information do you now feel were critical to your choice of MOS? (For example, things the Recruiter or Guidance Counselor told you, video segments you saw on JOIN, etc.)

6. Considering your current experiences in the Army, do you think it is possible to understand the advantages and disadvantages of an MOS before working in it?
(Circle ONE number)

Yes, I understood the advantages and disadvantages of the MOS before working in it 1
No, I had to work in the MOS to understand its advantages and disadvantages 2

7. Considering your current experiences in the Army, do you think it is possible to understand the advantages/disadvantages of Army life in general before experiencing it firsthand?
(Circle ONE number)

Yes, I understood the advantages and disadvantages of Army life in general before experiencing it 1
No, I had to experience Army life in general to understand its advantages and disadvantages 2

8. Looking back at your experience with your Army Recruiter, how satisfied do you feel?
(Circle ONE number)

NO Satisfaction - -	I would tell friends interested in the Army to avoid this Recruiter at all costs 1
LOW Satisfaction - -	I would tell friends interested in the Army to see this Recruiter only if no other Recruiter is available 2
MODERATE Satisfaction - -	I would tell friends interested in the Army to enlist through this Recruiter, but I would not give the Recruiter their names 3
HIGH Satisfaction - -	I would provide this Recruiter with the names of friends who might be interested in the Army 4
VERY HIGH Satisfaction - -	I would provide this Recruiter with the names of close friends or relatives who might be interested in the Army 5

9. Would you tell friends interested in the Army to enlist through this Recruiter?
(Circle ONE number)

Yes 1
Maybe 2
No 3

II. CAREER FACTORS

The next few pages contain questions concerning factors that contribute to job satisfaction. You will make three ratings for each factor on the following pages. Do rating 1 for all 20 questions first, then do rating 2 for all 20 questions, and then do rating 3 for all 20 questions.

Rating 1) In the first column on the following pages, rate each of the 20 job factors according to its importance to you, personally. Use this rating scale:

- 0 Not important at all
- 1 Somewhat important
- 2 Fairly important
- 3 Very important
- 4 Most important; I would not take a job that did not have this

Rating 2) In the second column, rate each of the 20 factors on the level of satisfaction you currently experience in the Army. Use this rating scale:

- 0 Very unsatisfied
- 1 Somewhat unsatisfied
- 2 Neutral
- 3 Somewhat satisfied
- 4 Very satisfied

Rating 3) Next, rate each of the 20 factors according to how satisfied you think you would be if you were not in the Army. Use this rating scale:

- 0 Very unsatisfied
- 1 Somewhat unsatisfied
- 2 Neutral
- 3 Somewhat satisfied
- 4 Very satisfied

Dear Soldier:

Because of the role the Army plays in our national defense, it is my desire to assist in every way that I can to make service in the Army as meaningful as possible. I seek your help in achieving this goal.

The United States Army Research Institute has been directed to conduct a survey of how the expectations of new recruits toward the Army lead to career dissatisfaction or satisfaction. In particular, the survey is concerned with determining to what extent the Army recruiting process provides new soldiers with accurate images and expectations of the Army. Your selection as a participant began with a survey you completed at the time of your enlistment. I encourage you to continue your participation and help the Army to make service more satisfying.

You will be contacted through a mail survey, and I would be grateful if you would take the time to answer all the questions. To ensure confidentiality, your responses will be combined with the others in the group surveyed and not identified by name.

I would like to thank you in advance for your time and cooperation.

Sincerely,

Dear Soldier:

About three weeks ago a questionnaire was sent to you asking for your views about your service in the Army. As of today, we have not yet received your completed questionnaire.

If you have already completed and returned the questionnaire to us, please accept our sincere thanks. If not, please try to complete it today. Your individual participation is quite important to the accuracy of the study. We must receive a completed questionnaire from each and every person selected to participate in the project in order to get the best information possible.

In the event that your questionnaire has been misplaced, a replacement is enclosed. Please answer your questionnaire and return it today.

Sincerely,
